PROFILE

Passionate Philosophy major eager to kickstart a tech career as a Frontend Engineer. Combining logic, problem-solving, and creativity for coding challenges, with a strong grasp of JavaScript, React.js, HTML, and CSS. Seeking collaborative opportunities with experienced developers to learn and grow. Committed to personal growth and contributing to the team's success.

EXPERIENCE

Freelancer

2023 - present

- Participated in the BGIT 2023 hackathon with a team of 6 and came third.
- Developed a non-functional app prototype aimed at enhancing the educational infrastructure in Nigeria.
- Collaborated with team members to ensure a cohesive and user-friendly app design.
- Responsible for creating visually engaging pitch presentation slides that effectively communicated the project's goals and features.

Ambassador

Cowrywise

2021 - present

- Helping over 1000 students by providing scalable solutions to questions on finance that they might have.
- Participate in company's community activities which include leading content distribution efforts to empower people in the basics of financial education.

Student

AltSchool Africa

2022 - 2023

- Built a Redactr app with a team of 10 in a hackathon organized by the school.
- The app allows users scramble a desired portion from a text with either asterisks, question marks or random symbols.
- It was viewed by 1000+ students in the program.
- Executed the project with Replit, JavaScript, HTML, and CSS.
- Successfully completed 15+ Leetcode challenges.
- This has significantly improved my logical approach to DSA challenges by 40%.
- Built a Recipe app.
- This app consumes a public API which exposes users to 2000+ meals, their recipes, and step by step instructions.
- Built app using JavaScript, HTML, and CSS.
- Successfully deployed app on Netlify and received positive review from 50+ users.
